· Timeless Chestnut for the New Retro Era ·

A decor that bridges the past and the present, Echo embodies the essence of the New Retro trend, merging nostalgia with contemporary design. Crafted from Chestnut, it features a linear wood structure with narrow cathedrals, giving it a dynamic yet contemporary aesthetic, creating a visual dialogue between eras. Its brushed surface enhances the natural texture, while the clean pore maintains a polished and sophisticated appearance. "Echo" is more than a decor; it is a statement of continuity, where the warmth of tradition meets the boldness of reinvention, making it a perfect choice for interiors that embrace both heritage and modernity.
