Raven

· Refined quiet texture ·

Woody is a decor that plays with perception—appearing as a unicolour from afar, yet revealing a subtle, linear structure up close. Its design is quietly layered, with hidden patterns that never dominate, allowing the structure to remain in the background. This intentional restraint gives Woody a modern, minimal character, while maintaining the warmth and familiarity of wood. Through a delicate shift in colour composition, a gentle wood grain can appear, adding texture and depth without overwhelming the surface.
