### · Subtle Sophistication in Natural Stone ·

Litha is a stone design that embodies serenity and sophistication. Its light, warm tones, with soft beige and creamy undertones, convey a sense of calm and visual balance. The delicate, diffused veining adds depth without overpowering the surface, aligning with the current trend toward quieter, more elegant materials. The natural and refined appearance of Onix makes it an ideal choice for contemporary interiors seeking brightness, spaciousness, and a feeling of well-being. Its calm aesthetic integrates seamlessly into minimalist, organic, Japandi, or Mediterranean-inspired spaces, where materials enhance the environment without overwhelming it.
