## · Subtle Rhythm in Wood Design ·

Nobara is a contemporary oak design that blends structured linear grain with soft cathedral patterns, creating a natural balance between order and movement. Its composition alternates fine lines with flowing areas, producing a subtle, continuous visual rhythm with a clean and refined look, free of strong contrasts. It features a scalable color range from light to dark tones, maintaining visual consistency. Inspired by artisanal processes, its finish evokes a reaction between vinegar and steel, adding authentic tones and depth. A light brushed effect enhances texture and grain direction, resulting in a natural, nuanced, and contemporary design.
