Tenue

· Quiet Geometry with Textural Depth ·

Fiorentini is a surface design that explores the balance between structure and ornament. Set against a warm, mineral-inspired base with subtle tonal variation, a soft geometric pattern emerges, reminiscent of woven textures or weathered graphic motifs. Rather than dominating the surface, the design reveals itself gradually, creating a sense of rhythm, depth, and understated richness.

Its textured yet refined character brings life and movement to the material, making Fiorentini an ideal choice for contemporary furniture and interiors that seek harmony, identity, and a sophisticated tactile presence.
